

CIRCULAR ECONOMY COMMITMENT

We recognize that realizing a **sustainable world** means that we must accelerate the transition to a **circular economy**.

At Bergner, we believe the path to a cleaner, healthier future begins with the decisions we make each day. That's why we build **sustainability** into everything we do and strive to make smarter, more efficient use of our natural resources.

Bergner is committed to driving the transition towards a circular economy through the following **actions**:

- 1.** Driving analysis of the **life cycle of the products** and incorporating **eco-design criteria**, reducing the introduction of harmful substances into their manufacture, making it easier to **repair the goods** produces, **prolonging their shelf life** and making it possible to obtain **value** from it at the end of its shelf life.
- 2.** Promoting the effective application of the **principle of hierarchy**, promoting **waste generation prevention**, promoting its **reuse**, strengthening **recycling** and promoting its **traceability**.
- 3.** Promoting guidelines that increase **innovation** and the overall **efficiency** of distribution processes, by adopting measures such as the implementation of environment and quality management systems.
- 4.** Promoting a model of **responsible consumption**, based on **transparency of the information** about the **properties of the goods**, their **duration** and **energy efficiency**, by using measures such as eco-labelling.
- 5.** Sharing the importance of moving from the linear economy towards a **circular economy**, promoting **process transparency**, raising **awareness** among citizens.
